# The Retreat

Production: "VEGA starlight film production company"  
London, United Kingdom.

# Storm Story

Aidan is the assistant to Hilary Ford, the CEO of a large technology company. When he receives an unexpected invitation to an annual retreat in the English countryside, he becomes entangled in a web of conspiracy among wealthy and influential executives of the company.

“The Retreat” is a detox therapy where the guests must have complete disconnection from the outside world. They are forced to hand in any phones, laptops and electronic devices for maximum connection with nature and each other.

Left with only each other to interact with we see discontent within the company bubble towards the surface. Aidan learns of the companies financial troubles, ethical concerns and sexual indiscretions during a myriad of organized events. The tension culminates at dinner where Hilary announces that she suspects a traitor within the company has leaked details of a revolutionary piece of technology to a competitor. Hours later she is murdered in her bedroom.

Aidan explores the manor for their phones to contact the outside world but as he does he stumbles upon clues and begins to unravel a web of lies. As the conspiracy begins to reveal itself, Aidan is pulled deeper down the rabbit hole and when a second mysterious murder occurs discovering the killer quickly becomes a matter of life or death.
